

THRIVE TOGETHER Youth Engagement

When drafting the Cincinnati Region's Comprehensive Climate Action Plan, Thrive Together wanted to know what innovative sustainability solutions young people envisioned for the region

We wanted to know:

- environmental issues young people see
- their sustainability solutions
- barriers to solving these issues

To do so:

We hosted **8 workshops**

Talked with **110 young people**

Gathered **+400 ideas**

Most discussed topics:

Some Proposed Sustainability Solutions:

Limiting single-use plastics

Preserving wild land in the suburbs

Sustainability education in schools

Suburban bus routes

Hands-on volunteer experiences

Protecting native species

More recycling bins and signage

Some Barriers to implementing solutions:

Public Attitudes

Money

Knowledge
