

SUGGESTIONS FOR CURRENT PARK PROPERTY

1. Keep most of acreage in agriculture and work with tenant farmer to obtain funding for conservation practices and utilize these practices for education. Examples include buffer strips, grassed waterways, and cover crops.
2. Build a retention basin/wetland to provide stormwater control and nutrient reduction to demonstrate how a conservation practice can function as an urban stormwater solution.
3. Develop trails through the wooded portion of property for conservation education.
4. Improve pond behind the barn for conservation education.
5. Stabilize existing historic barn for use in public conservation programming.
