**Notice of Intent to Apply - CPRG Implementation Grants Competition**

Dear Ms. Bancroft:

Kinder Morgan Queen City Terminal would like to announce our intent to apply for funding through the Climate Pollution Reduction Grants Program. We want to emphasize the importance of securing additional resources to enhance our services and fulfill our mission of serving the community. With this notice, we aim to demonstrate our commitment to pursuing funding opportunities that align with the objectives of the EPA and CPRG. Please see below for details pertaining to our application:

- Kinder Morgan – Queen City Terminal
- “Fueling Efficiency”
- The proposed project aims to address two critical areas of improvement within our infrastructure: the replacement of existing steam transmission lines that supply product heating capabilities and upgrading/replacing (3) decades-old natural gas fired boilers. Our current steam lines suffer from significant leakage issues and heat loss due to missing insulation and inadequate steam traps, resulting in inefficiency and unnecessary energy consumption. By replacing these deteriorating assets with new, insulated lines, we will enhance the overall efficiency of our heating operations and minimize heat loss. Additionally, our aging boilers would be replaced/upgraded with newer technology models, ensuring improved energy efficiency and reduced GHG emissions. This comprehensive approach will not only improve the performance and reliability of our heating system and operations but also contribute towards our commitment to being an “Environmentally Compliant and Responsible Operator,” one of our core values.
- This proposal would be scheduled to be completed in multiple phases, with the completion date being year-end 2028.
- Funding Request Amount - **\$2,942,262**
- Current GHG emissions:

	CO2 (tonnes)	CH4 (tonnes)	N2O (tonnes)
2021 Total	937.4405107	0.017667556	0.001766756
2022 Total	1050.445269	0.01979731	0.001979731
2023 Total	967.1474358	0.01822743	0.001822743

- Proposal’s Impact on GHG emissions – TBD by Kinder Morgan engineering & environmental departments.

Sincerely,  

Matthew White  
Terminal Manager
